

STER-L-RAY®

GERMICIDAL ULTRAVIOLET LAMPS

Most Lamps Offered Are
★★★★★
MADE IN THE
USA

- Extensive stocking inventory of Germicidal Ultraviolet (UV-C) Lamps (OEM and replacement)
- Instant Start, Preheat, Cold Cathode, High Output, High Intensity, and Amalgam lamps
- Ozone and non-ozone producing lamps
- Standard and custom manufacturing
- Quality; Long Life

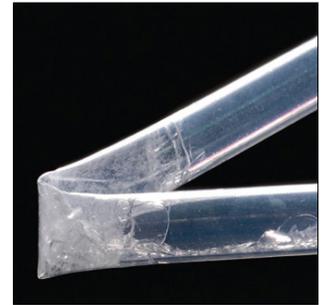

ArmorLite™

ULTRAVIOLET LAMP SAFETY SHIELD

★★★★★
MADE IN THE
USA

- The **ArmorLite™** Safety Shield is a protective envelope that can be applied to most germicidal lamps (linear lamps up to 64-inches long) purchased from and manufactured by Atlantic Ultraviolet Corporation®.
- The **ArmorLite™** Safety Shield provides increased security for employees, products and work environments by eliminating the dangers associated with fragments of a broken lamp.
- **ArmorLite™** protected lamps are available for use with new or existing ultraviolet installations.

Surelite™

ELECTRONIC BALLAST

- State-of-the-art electronic ballasts developed for operation of **STER-L-RAY®** Germicidal Ultraviolet (UV-C) Lamps
- Deliver high ultraviolet lamp output
- Save energy through high efficiency
- Operate cool for longer life
- Lightweight
- Operate a wide range of UV-C lamps

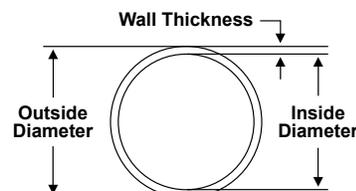

CRYSTAL CLEAR™

QUARTZ SLEEVES & TUBING

★★★★★
MADE IN THE
USA

- High quality, fire polished quartz sleeves
- Large inventory
- Wide range of diameters, wall thickness, and lengths
- Supplied with open ends or with closed test tube ends
- Custom configurations and fabrication available upon request

Steadfast™

LAMP HOLDERS & WIRING DEVICES

- Quality lampholders and sockets for use with Germicidal Ultraviolet (UV-C) Lamps
- Various styles and configurations to choose from
- Single Pin Lamps: Tombstone Telescopic, Lamp Socket and Lead Wire, Butt-on
- Multi-Pin Lamps: Lamp Socket and Lead Wire, Miniature Bi-Pin, Lampholder for U-Shape Lamps, 3-Pin Socket and 4-Pin Socket

BRIEF HISTORY AND BACKGROUND:

Atlantic Ultraviolet Corporation® started manufacturing UV equipment back in 1963. Eventually, efforts were expanded to include manufacture of germicidal ultraviolet lamps (under the trademark name **STER-L-RAY**®) and fabrication of quartz sleeves (under the trademark name **CRYSTAL CLEAR**™) that were designed specifically for and utilized in each of our models. After some time, there was much interest from customers who needed a quality UV lamp manufacturer that could supply a broader range of germicidal ultraviolet (UV-C) lamps, as well as quartz sleeves, to service their needs as well as the market. In addition, there was an increased demand for supply of equivalent replacement UV lamps and quartz sleeves for existing UV equipment made by other manufacturers; some of which had gone out of business and left customers stranded without a source for annual lamp or quartz sleeve replacement. So, over the years, Atlantic Ultraviolet Corporation® has expanded the manufacturing of **STER-L-RAY**® germicidal lamps and **CRYSTAL CLEAR**™ Quartz sleeves and currently offers a wide range of equivalent replacement lamps and quartz sleeves for just about every make and model of germicidal ultraviolet equipment on the market.

Atlantic Ultraviolet Corporation® also welcomes OEM customers to utilize our products (**STER-L-RAY**® Lamps, **CRYSTAL CLEAR**™ Quartz Sleeves, **Steadfast**™ Lampholders & Wiring Devices, **Surelite**™ Electronic Ballasts and if needed, **ArmorLite**™ Ultraviolet Lamp Safety Shield) for their own equipment design.

Call and speak with one of our UV Application Specialists to help—whatever you need—for assistance with a design or guidance to the proper replacement parts, etc. Contact us and we will do our best to help.
